and Torres Strait Islander Studies

AIATSIS Language Thesaurus

June 2017

About AIATSIS – www.aiatsis.gov.au

The Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS) is the world's leading research, collecting and publishing organisation in Australian Indigenous studies. We are a network of council and committees, members, staff and other stakeholders working in partnership with Indigenous Australians to carry out activities that acknowledge, affirm and raise awareness of Australian Indigenous cultures and histories, in all their richness and diversity.

AIATSIS develops, maintains and preserves well documented archives and collections and by maximising access to these, particularly by Indigenous peoples, in keeping with appropriate cultural and ethical practices.

AIATSIS Language Thesaurus

Introduction

The AIATSIS thesauri have been made available to assist libraries, keeping places and Indigenous knowledge centres in indexing / cataloguing their collections using the most appropriate terms.

This is also in accord with Aboriginal and Torres Strait Islander Library and Information Research Network (ATSILIRN) Protocols - <http://aiatsis.gov.au/atsilirn/protocols.php>

Protocol 4.1 states:

“Develop, implement and use a national thesaurus for describing documentation relating to Aboriginal and Torres Strait Islander peoples and issues”

We trust that the AIATSIS Thesauri will serve to assist in this task.

About the thesaurus

The AIATSIS Language Thesaurus contains headings for Indigenous languages / dialects and peoples. These headings are used to describe all items held in Mura[®], the AIATSIS Collections Catalogue – <http://mura.aiatsis.gov.au>

We welcome your comments on the AIATSIS thesauri. Send these comments to library@aiatsis.gov.au including the heading from the thesaurus that you wish to provide comments on.

Using the thesaurus

Display formats

The thesaurus is in alphabetical order, with each entry displaying all related terms.

This will display the term followed by its relationships and will be followed by the next alphabetical entry with its relationships. The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

BT: Broader Term

NT: Narrower Term

UF: Use For

Structure and display

Hierarchical relationships

This structure is reflected in the thesaurus as a hierarchical structure.

The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

Example:

Gamilaraay / Gamilaroi / Kamilaroi language (D23) (NSW SH55-12)

UF: D23 (language code)
Kamilaroi language (D23) (NSW SH55-12)

BT: Wiradjuric language group

NT: Gawambaray language (D39) (Qld SH55-16)
Gunybaray language (D15) (NSW SI55-4)
Wiryaraay language (D28) (NSW SH56-5)
Yuwaalaraay / Euahlayi / Yuwaaliyaay language (D27) (NSW SH55-7)

Language codes

In the thesaurus, you will find language codes such as **D23 (language code)** or after a language name eg **Kamilaroi language (D23) (NSW SH55-12)**.

The language codes are useful for long term users of the AIATSIS collections. Otherwise, users of the thesaurus do not need to take notice of the codes.

Linguistic expertise was invaluable during the development of these authorities.

Additions to headings

The majority of headings in the AIATSIS language thesaurus contain map grid references. These grid references relate to the 1: 250 000 map sheet areas.

Example: **Kamilaroi language (D23) (NSW SH55-12)**

Indigenous Language Links

- [Aboriginal Languages of Australia](#)
Annotated links to resources for about 60 languages.
