**August 2018**

## About AIATSIS – [www.aiatsis.gov.au](http://www.aiatsis.gov.au)

The Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS) is the world's leading research, collecting and publishing organisation in Australian Indigenous studies. We are a network of council and committees, members, staff and other stakeholders working in partnership with Indigenous Australians to carry out activities that acknowledge, affirm and raise awareness of Australian Indigenous cultures and histories, in all their richness and diversity.

AIATSIS develops, maintains and preserves well documented archives and collections and by maximising access to these, particularly by Indigenous peoples, in keeping with appropriate cultural and ethical practices.

# AIATSIS Subject Thesaurus

## Introduction

The AIATSIS thesauri have been made available to assist libraries, keeping places and Indigenous knowledge centres in indexing / cataloguing their collections using the most appropriate terms.

This is also in accord with Aboriginal and Torres Strait Islander Library and Information Research Network (ATSILIRN) Protocols - <http://atsilirn.aiatsis.gov.au/protocols.php>

Protocol 4.1 states:

*“Develop, implement and use a national thesaurus for describing documentation relating to Aboriginal and Torres Strait Islander peoples and issues”*

We trust that the AIATSIS Thesauri will serve to assist in this task.

## About the thesaurus

The AIATSIS thesaurus contains headings for language group and people, subjects relating to Australian Aboriginal and Torres Strait Islander studies, and place names. These headings are used to describe all items held in Mura<sup>®</sup>, the AIATSIS Collections Catalogue.

The AIATSIS thesaurus will be updated every 1-2 months.

We welcome your comments on the AIATSIS thesaurus. Click on the [Feedback](#) link on the page for the heading that you wish to provide comments on.

## Using the thesaurus

### Display formats

The thesaurus is in alphabetical order, with each entry displaying all related terms.

This will display the term followed by its relationships and will be followed by the next alphabetical entry with its relationships. The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

**BT (1,2,3 etc.):** Broader Term and hierarchy

**NT (1,2,3, etc.):** Narrower Term and hierarchy

**UF:** Use For

## Structure and display

### Hierarchical relationships

The thesaurus is based on a hierarchical structure.

The subject thesaurus reflects the library's exclusive interest in Aboriginal and Torres Strait Islander studies. Where possible the choice of headings tries to reflect Indigenous perspectives. For example, headings under the term Religion relate to Australian Indigenous religious practices and concepts. Other world religions such as Christianity or Buddhist entered under Religions.

The subject headings are faceted. This clearly shows the hierarchy to which each term belongs. For example, the heading for mutton birds is: Animals - Birds - Mutton birds. This indicated other types of birds will be found by moving to the next level up the hierarchy and records for all animals by moving up again . Please note that these hierarchies are constructed to aid searching and do not necessarily reflect formal scientific categories.

The following abbreviations have been used in the thesaurus: "Broader Terms" represent more general concepts than "Narrower Terms", which are more specific terms. These are labelled as BT (broader term) and its reciprocal relationship of NT (narrower term).

17th Century contacts

USE: Settlement and contacts - 17th Century
